EDUCATION

SRM Institute of Science and Technology 2025 - 2029 (expected)

B.Tech in Computer Science & Engineering - Chennai, India

EXPERIENCE

Forma Labs - Co-founder Aug 2026 - Present

- Co-founded a two-person studio building web interfaces and backend services for client projects.
- Currently developing a website for a financial-services client.

Founders Club - Technical Staff Sep 2026 - Present

- Built and published the IdeaSpark 3.0 playbook in Next.js, covering the event schedule, tracks, judging criteria and participant guidance. Source

Futurix - Technical Staff Sep 2025 - Present

- Contributed to team registration and project-submission flows for the Ultron 9.0 hackathon platform, using React, TypeScript, PHP and MySQL.

PROJECTS

Cursus Completed

Next.js, TypeScript, Supabase, PostgreSQL/pgvector, OpenAI, Inngest, Redis

- Built a study workspace with private uploads, source-cited chat, summaries, quizzes and one-way Google Calendar sync.
- Used background document indexing and vector retrieval, with row-level access controls, per-user request/token budgets and file validation.

sable In development

C++/WinRT, WinUI 3, PDFium, Direct2D

- Rebuilding NightPDF as a native Windows reader with tabs, search, text selection, document outlines and printing.
- Kept PDFium work off the UI thread and applied night filters with Direct2D while preserving original thumbnail and print colours.

clipstash Usable from source

Python, CLI

- Built a CLI to save, tag, search and copy code snippets, with JSON import and export.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C++, SQL, PHP

Web: React, Next.js, HTML/CSS, Tailwind CSS

Data and backend: Supabase, PostgreSQL, pgvector, MySQL, Redis, REST APIs

Tools: Git, Docker, Vercel
